The Occupational Employment Statistics (OES) wage survey is a semi-annual mail survey that measures occupational employment and wage rate for all full-time and part-time wage and salary workers in nonfarm industries covered by unemployment insurance. The surveys collect data for the payroll period including the 12th day of May or November. The survey does not cover the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers. The wage rates published here are considered "informational," meaning they cannot be used for Montana Prevailing Wage or Foreign Labor Certification purposes.

About May 2013 State and Metropolitan Area Occupational Employment and Wage Estimates

(1) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(2) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(3) The relative standard error (RSE) is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

(4) Shown: * Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries depending on how they are typically paid.

(5) Shown: # This wage is equal to or greater than $90.00 per hour or $187,200 per year.

(8) Shown: ** Estimates not released.

Notes:.....

** = indicates that a wage estimate is not available*

*** = indicates that an employment estimate is not available*

 # = indicates a wage greater than $90.00 per hour or $187,200 per year

~ = indicates that the percent of establishments reporting the occupation is less than 0.5%

Network and Computer Systems Administrators 15-1142

Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures.

Lay Title Examples: *LAN/WAN Administrator, Network Control Operator, Network Coordinator, Network Security Administrator, Network Systems Administrator, PACS Administrator*

Materials Engineers 17-2131

Evaluate materials and develop machinery and processes to manufacture materials for use in products that must meet specialized design and performance specifications. Develop new uses for known materials. Includes those engineers working with composite materials or specializing in one type of material, such as graphite, metal and metal alloys, ceramics and glass, plastics and polymers, and naturally occurring materials. Includes metallurgists and metallurgical engineers, ceramic engineers, and welding engineers.

Lay Title Examples: *Automotive Sheet Metal Engineer, Corrosion Engineer, Forensic Materials Engineer, Metallographer, Metallurgical Engineer*

Foresters 19-1032

Manage public and private forested lands for economic, recreational, and conservation purposes. May inventory the type, amount, and location of standing timber, appraise the timber's worth, negotiate the purchase, and draw up contracts for procurement. May determine how to conserve wildlife habitats, creek beds, water quality, and soil stability, and how best to comply with environmental regulations. May devise plans for planting and growing new trees, monitor trees for healthy growth, and determine optimal harvesting schedules.

Technical Notes for May 2013 OES Estimates

Scope of the survey

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 500 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OES survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OES estimates are constructed from a sample of about 1.2 million establishments. Each year, forms are mailed to two semiannual panels of approximately 200,000 sampled establishments, one panel in May and the other in November. May 2013 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2013, November 2012, May 2012, November 2011, May 2011, and November 2010. The overall national response rate for the six panels is 75.3 percent based on establishments and 71.6 percent based on employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 57.5 percent of total national employment. (Response rates are slightly lower for these estimates due to the Federal shutdown in October 2013.)

In Montana, the Department of Labor & Industry, Research and Analysis Bureau, OES Program estimates are constructed from a sample of about 9,000 establishments. Each year, forms are mailed to two semi-annual panels of approximately 3,000 sampled establishments, one panel in May and the other in November. May 2013 estimates are based on responses from six semi-annual panels collected over a 3-year period: May 2013, November 2012, May 2012, November 2011, May 2011 and November 2010. The overall Montana response rate for the six panels is 94.88 percent based on establishments and 89.48 percent based on employment.

Establishments on the frame are stratified by geographic area and industry group.

- **Geography**—Montana has 3 Metropolitan Statistical Areas (MSAs) and 4 nonmetropolitan or balance-of-state (BOS) areas are specified.

- **Industry**—344 industry groups are defined at the NAICS 4-, 5-, or 6-digit level.

- **Ownership**—Schools are also stratified by state government, local government, or private ownership. Also, local government casino and gambling hotels are sampled separately from the rest of local government.

- **Size**—Establishments are divided into certainty and noncertainty size classes.

The occupational coding system

The OES survey categorizes workers into 821 detailed occupations based on the 2010 Office of Management and Budgets Standard Occupational Classification (SOC) system. Together, these detailed occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included.

For more information about the SOC system, please see the BLS website at www.bls.gov/soc/.

The industry coding system

The May 2013 OES estimates are based on the 2012 North American Industry Classification System (NAICS). For more information about NAICS, see the BLS website at www.bls.gov/bls/naics.htm.

The OES survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) also are excluded. OES federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

The OES survey covers all full- and part-time wage and salary workers in nonfarm industries. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Survey sample

The OES survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OES survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. An annual census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

Concepts

Occupational employment is the estimate of total wage and salary employment in an occupation. The OES survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. Working supervisors (those spending 20 percent or more of their time doing work similar to the workers they supervise) are classified with the workers they supervise. Workers receiving on-the-job training, apprentices, and trainees are classified with the occupations for which they are being trained.

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

OES receives wage rate data for the federal government, the U.S. Postal Service, and some state governments. For the remaining establishments, the OES survey collects wage data in 12 intervals. For each occupation, respondents are asked to report the number of employees paid within specific wage intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours. The responding establishments are instructed to report the hourly rate for part- time workers, and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

Wages	Interval	
	Hourly	Annual
Range A	Under $9.25	Under $19,240
Range B	$9.25 to $11.49	$19,240 to $23,919
Range C	$11.50 to $14.49	$23,920 to $30,159
Range D	$14.50 to $18.24	$30,160 to $37,959
Range E	$18.25 to $22.74	$37,960 to $47,319
Range F	$22.75 to $28.74	$47,320 to $59,799
Range G	$28.75 to $35.99	$59,800 to $74,879
Range H	$36.00 to $45.24	$74,880 to $94,119
Range I	$45.25 to $56.99	$94,120 to $118,559
Range J	$57.00 to $71.49	$118,560 to $148,719
Range K	$71.50 to $89.99	$148,720 to $187,199
Range L	$90.00 and over	$187,200 and over

Estimation methodology

The OES survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OES panel includes approximately 200,000 establishments. The full six-panel sample of nearly 1.2 million establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

Wage updating. Significant reductions in sampling errors are obtained by combining six panels of data, particularly for small geographic areas and occupations. Wages for the current panel need no adjustment. However, wages in the five previous panels need to be updated to the current panel's reference period.

The OES program uses the BLS Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel's data. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division.

Imputation. About 20 to 25 percent of establishments do not respond for a given panel. A "nearest neighbor" hot deck imputation procedure is used to impute missing occupational employment totals. A variant of mean imputation is used to impute missing wage distributions.

Weighting and benchmarking. The sampled establishments are weighted to represent all establishments for the reference period. Weights are further adjusted by the ratio of employment totals (the average of November 2012 and May 2013 employment) from the BLS Quarterly Census of Employment and Wages to employment totals from the OES survey.

Uses

For many years, the OES survey has been a major source of detailed occupational employment data by industry for the nation, states, and areas. This survey provides information for many data users, including individuals and organizations engaged in planning vocational education programs, higher education programs, and employment and training programs. OES data also are used to prepare information for career counseling, for job placement activities performed at state workforce agencies, and for personnel planning and market research conducted by private enterprises. OES data also are used by the Department of Labor's Foreign Labor Certification (FLC) program, which sets the rate at which workers on work visas in the United States must be paid.
